

## TECHNICAL REQUIREMENTS

Requirement	Features
Hardware	
Processor	Processor with 4 core 1.9 Ghz or higher, either Physical or Virtual Processor.
Memory	8 GB RAM or higher. * Increase RAM if working with Windows RDP at same DB server.
Disk space	100 Gb available, preferably on a physical disk other than that of the Operating System. * It is recommended to use Disk Array for data protection in case of failure, these disk drives must be independent of the operating system disk drive. In addition to an additional reserved space for database information backup and Proceso system files.
Network Card	Local Area Ethernet 1 Gbps or higher. * VPN connections not recommended
Software	
Operating System	64-bit Windows Server, (2012 onwards).
Database	Microsoft SQL Server 2012 x64 version standar.
IIS	* Microsoft internet information services as well as TCP/IP communication port.
Cal Remote Desktop SQL	* One license for each user for the Standard SQL case
Cal Remote Desktop Windows	* One license for each user for remote connections outside the local network.

\* Optional requirements according to operational and configuration needs of the contracted system, which must be analyzed between Proceso Consultores and the client's IT area.

**Features considered in a specific environment of: Exclusive Server for SQL Database Service and the complete Suite "Proceso" with capacity of 1000 employees, through the TCP/IP protocol on local network in Client – Server mode. A significant increase or variation of some of the features should be subject to review.**
